

# Lecture 40, Part 1: Adjusting Development Environment for Javascript Development

---

- How to set up Sublime Text 3 to launch from command line from the directory you are currently in:
  - For Windows:  
<https://scotch.io/tutorials/open-sublime-text-from-the-command-line-using-subl-exe-windows>
    - If the link above doesn't work (as PDF links sometimes don't), try this one: <https://goo.gl/KQYeOD>
  - For MacOS:  
<http://olivierlacan.com/posts/launch-sublime-text-3-from-the-command-line/>
    - If the link above doesn't work (as PDF links sometimes don't), try this one: <https://goo.gl/fDqpMu>
